

GERALD CATINA

Southern Leyte State University - Main Campus
Sogod, Southern Leyte

geraldcatina5@gmail.com
+(63) 970 068 4932

SKILLS

- **Languages** Python, C#, JavaScript, Java, PHP
- **Tools/Frameworks** Flask, React, NodeJS, TailwindCSS, Bootstrap, Laravel, MySQL, PostgreSQL
- **Specialization** Data Analysis, Machine Learning, Deep Learning, APIs, GIS

EDUCATION

Bachelor of Science in Information Technology
Southern Leyte State University - Main Campus

August 2022 – May 2026

- GWA: 1.4, Relevant Courses: Data Structures, Web Dev, Databases, and Software Engineering

PROJECTS

- DeepCoralAI** | [Live Demo](#)
Capstone Project (Programmer) Technologies: Python, Flask, TensorFlow, PostgreSQL, QGIS, AWS
 - Developed a full-stack web application automating coral reef cover estimation by integrating GIS spatial data with deep learning models.
 - Built robust backend RESTful APIs using Flask and PostgreSQL to handle real-time image processing and frontend data visualization.
- Marine Conservation Website** | [Live Demo](#)
Technologies: React, NodeJS, TailwindCSS, Netlify
 - Designed a modern, responsive frontend for a marine conservation NGO, utilizing TailwindCSS to ensure cross-device UI/UX compatibility.
 - Collaborated with stakeholders to implement feedback loops, improving site engagement and resource accessibility.
- Portfolio Website** | [Live Demo](#)
Technologies: JavaScript, HTML5, CSS3, GitHub Pages
 - Built a lightweight, responsive personal portfolio from scratch to showcase technical projects, skills, and open-source contributions.
 - Optimized asset delivery and clean code architecture to ensure fast loading times across mobile and desktop browsers.

WORK EXPERIENCE

- GIS Tech Center – SLSU | GIS Developer Intern**
January 2026 — May 2026
 - Developed spatial mapping applications and streamlined data workflows using SQL-based expressions for precise GIS dataset integration.
- Freelance Web Developer | Remote / Self-Employed**
January 2025 — Present
 - Architected and deployed responsive custom full-stack websites for local clients, prioritizing mobile-first optimization and fast asset delivery.

AWARDS AND CERTIFICATES

- Best Technology Pitch (DeepCoralAI) — 1st Place | Visayas State University | April 2026**
 - Awarded 1st place out of competing universities, pitching a deep learning capstone to industry experts, entrepreneurs, and IPOPHL representatives.
- SIKAPTala National IT & CS Competition — Top 2 (Research Category) | National Level | May 2026**
 - Secured 2nd place out of 56 participating universities nationwide for outstanding technical research presentation.
- CCSIT Programming Competition — 1st Place | Southern Leyte State University | March 2024**
 - Won 1st place in a university-level competitive programming contest testing advanced algorithmic and problem-solving skills.
